Yas Marina — Corner Performance Summary

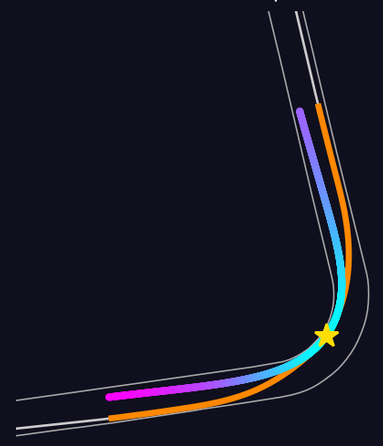
Bag: hackathon_wheel_to_wheel.mcap | Raceline: minimum curvature | 4 corners analysed

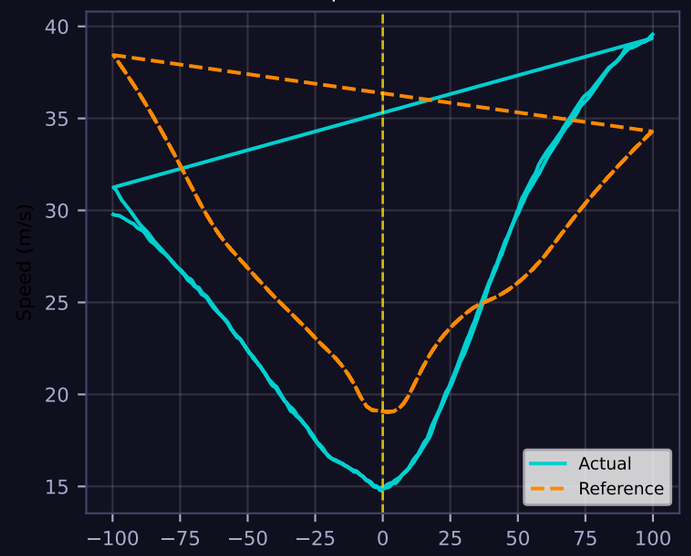
Corner	Radius	Ref Spd at apex	Entry speed	Apex speed	Exit speed	Apex lat dev (m)	Apex lag (m)	Early throttle	Issues
	31 m	19.1 m/s	81%	79%	101%	+0.30	-100	✗ Yes	Over-braking on entry; Slow apex; Early apex; Early th
	20 m	15.3 m/s	93%	87%	97%	+4.15	+2	✗ Yes	Slow apex; Early throttle
	13 m	12.8 m/s	72%	57%	55%	-1.33	+35	✗ Yes	Over-braking on entry; Slow apex; Slightly wide at apex; Late apex; Early th
	21 m	16.1 m/s	81%	77%	77%	-0.16	-76	✗ Yes	Over-braking on entry; Slow apex; Early apex; Early throttle; Thr

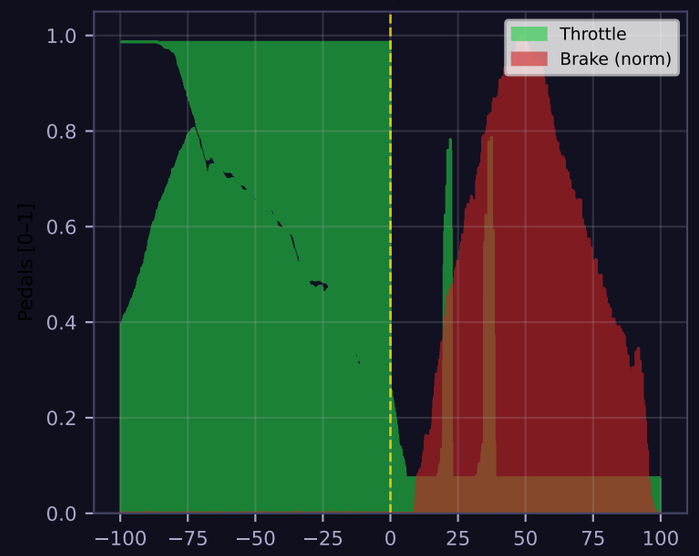
■ Green = within reference ■ Amber = 1 issue ■ Red = significant deviation

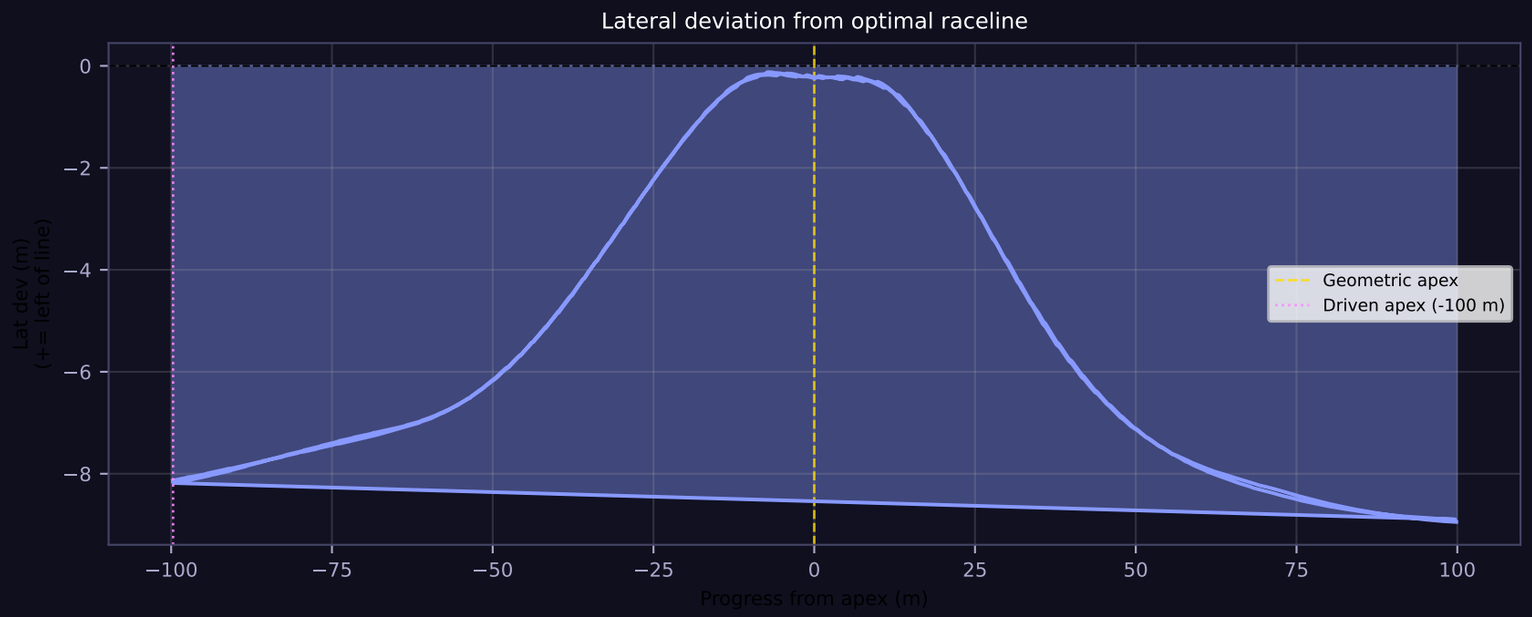
C1 (R, R=31m, 19.1m/s)

Apex at s = 379 m | Reference speed: 19.1 m/s | Window: [279, 479] m









Corner analysis

```
Entry speed:  81.1%
Apex speed:   78.8%
Exit speed:   100.6%

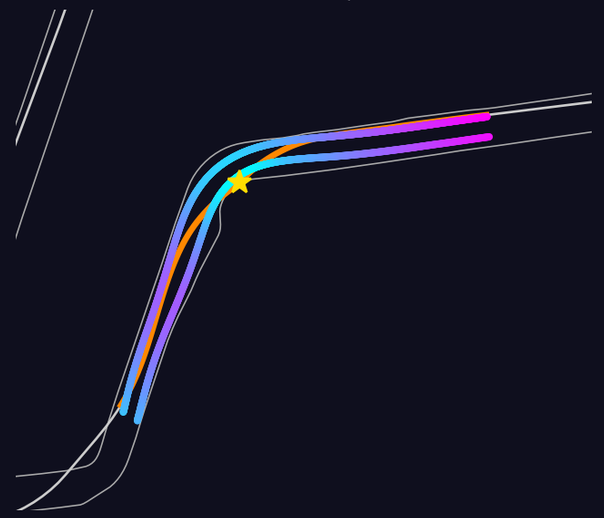
Apex lat dev: +0.30 m
Apex lag:     -99.7 m
Brake start:  +9 m from apex
Throttle app: +0 m from apex
```

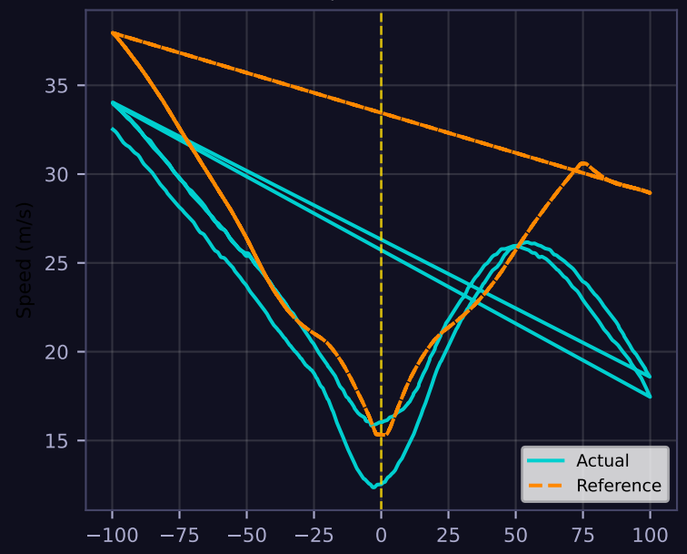
⚠ Issues detected:

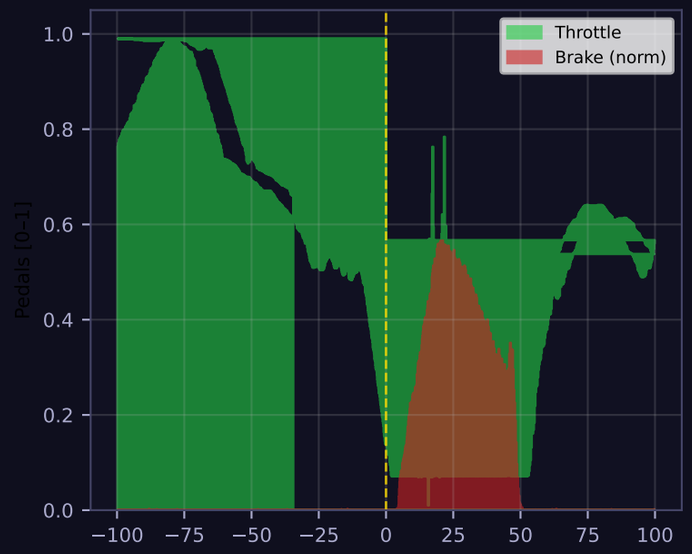
- Over-braking on entry
  Entry speed 81% of reference (−19%)
- Slow apex
  Apex speed 79% of reference (−21%)
- Early apex
  Driven apex 100 m before geometric apex
- Early throttle
  Throttle applied before apex — risk of understeer on exit

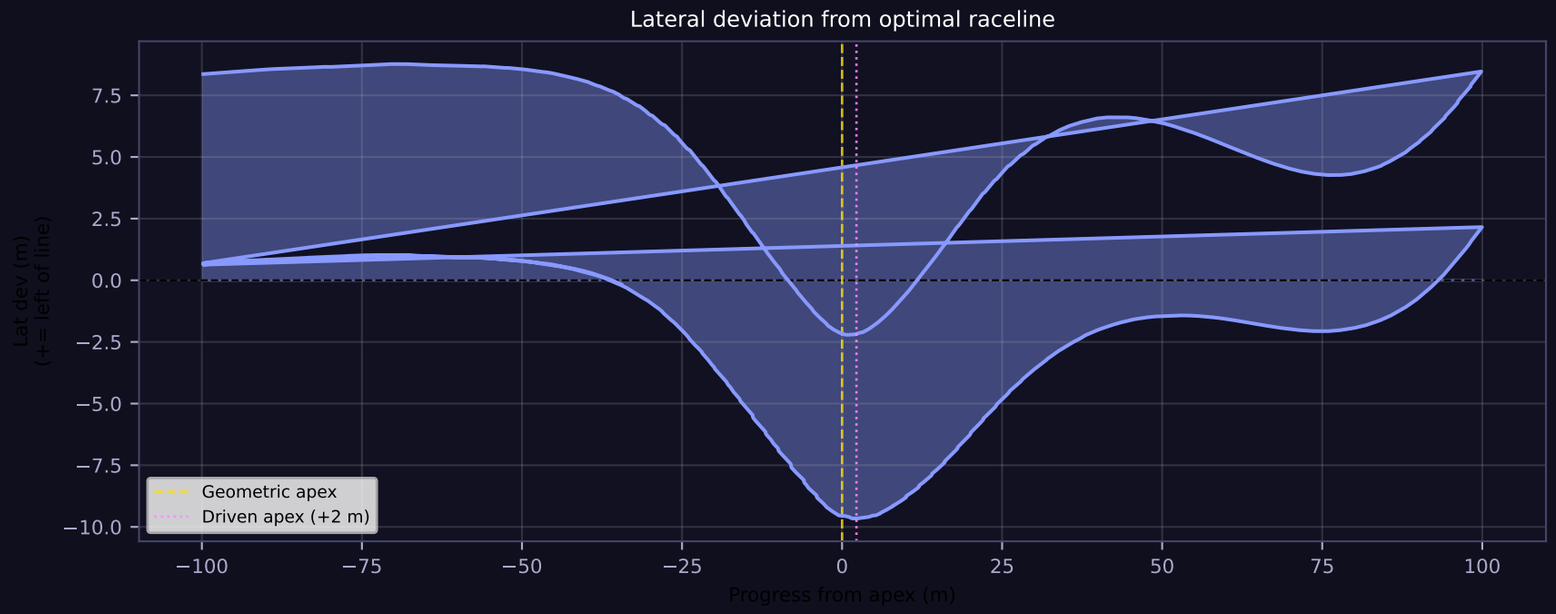
C2 (R, R=20m, 15.3m/s)

Apex at s = 931 m | Reference speed: 15.3 m/s | Window: [831, 1031] m









Corner analysis

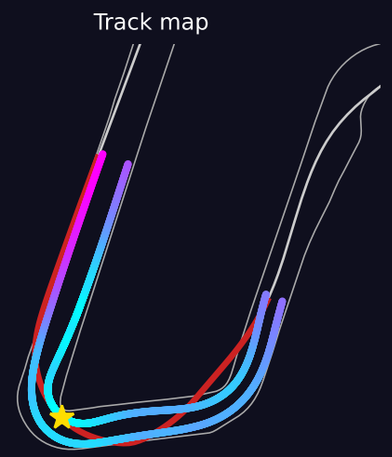
```
Entry speed:  93.3%
Apex speed:   87.4%
Exit speed:   97.1%

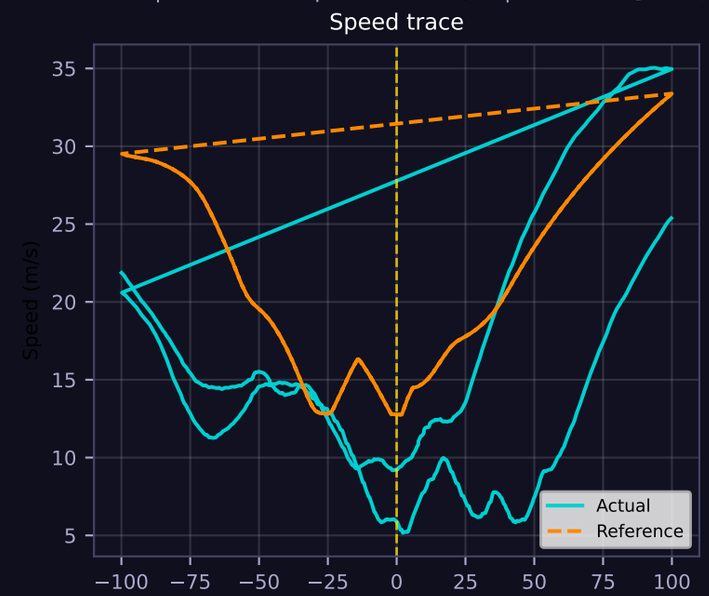
Apex lat dev: +4.15 m
Apex lag:     +2.2 m
Brake start:  +5 m from apex
Throttle app: +0 m from apex

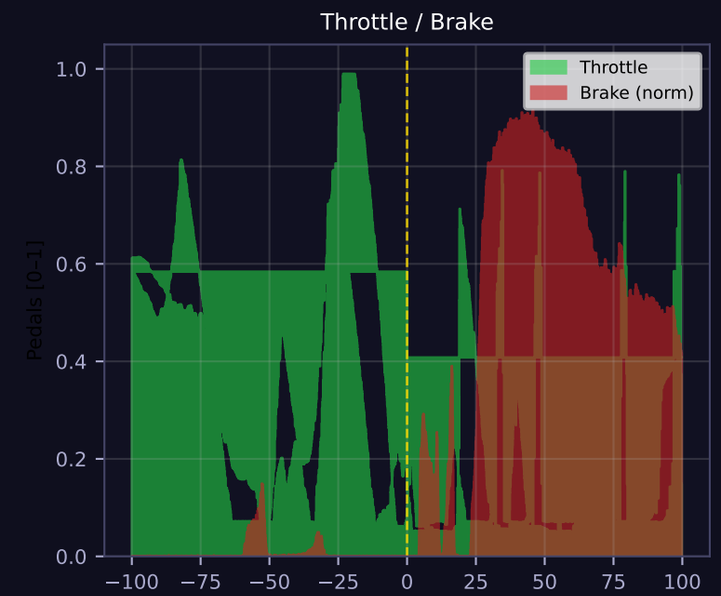
⚠ Issues detected:
  • Slow apex
    Apex speed 87% of reference (−13%)
  • Early throttle
    Throttle applied before apex — risk of understeer on exit
```

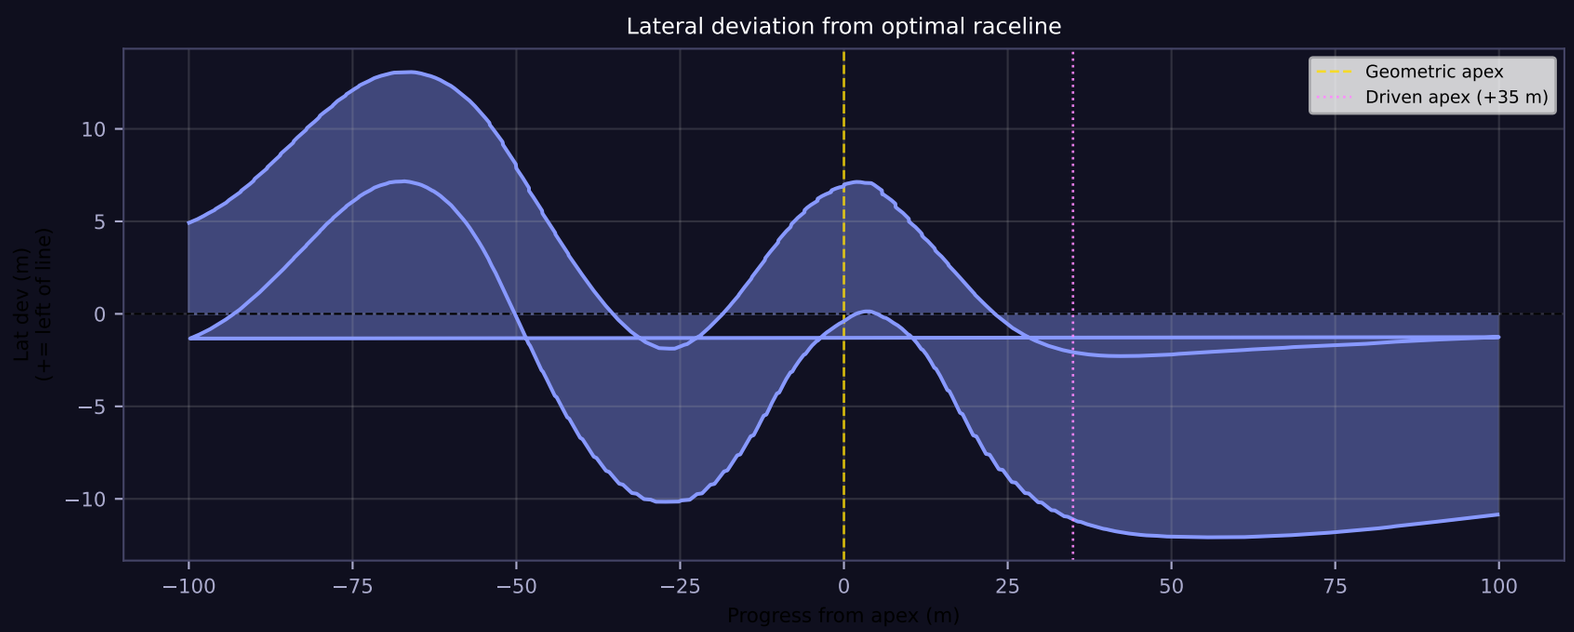
C3 (R, R=13m, 12.8m/s)

Apex at s = 1117 m | Reference speed: 12.8 m/s | Window: [1017, 1217] m









Corner analysis

```
Entry speed:  71.9%
Apex speed:   57.5%
Exit speed:   55.4%

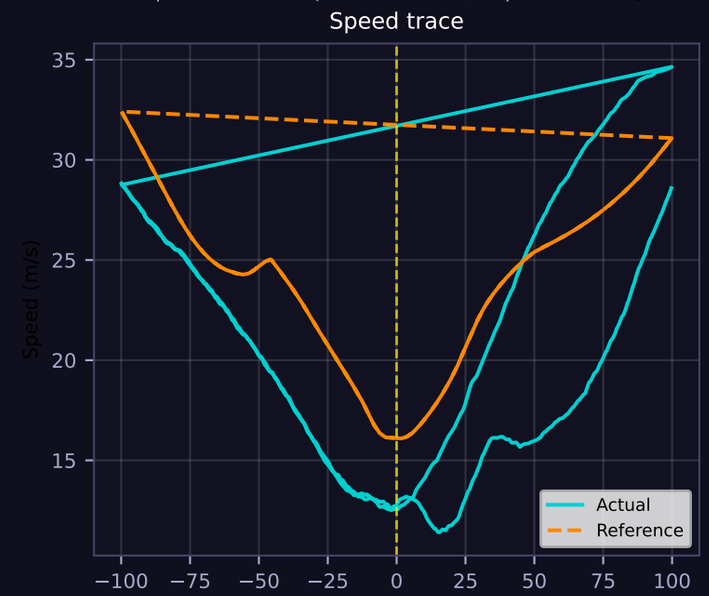
Apex lat dev: -1.33 m
Apex lag:     +35.0 m
Brake start:  -59 m from apex
Throttle app: +1 m from apex
```

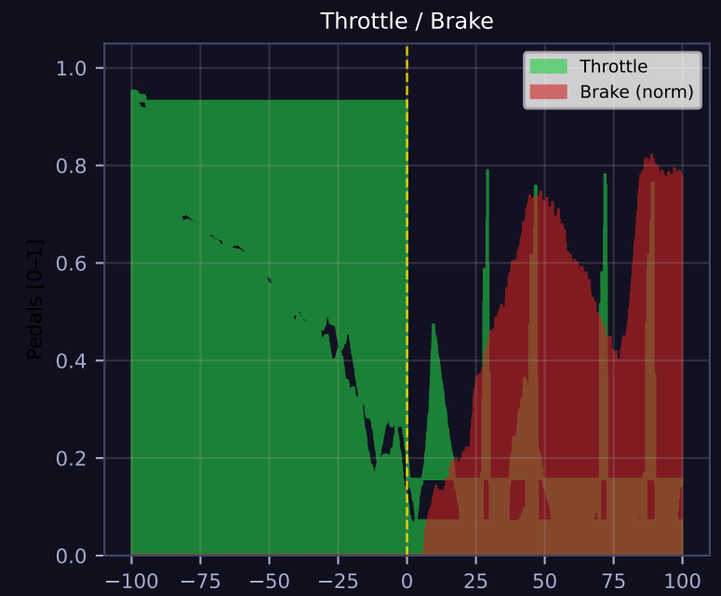
⚠ Issues detected:

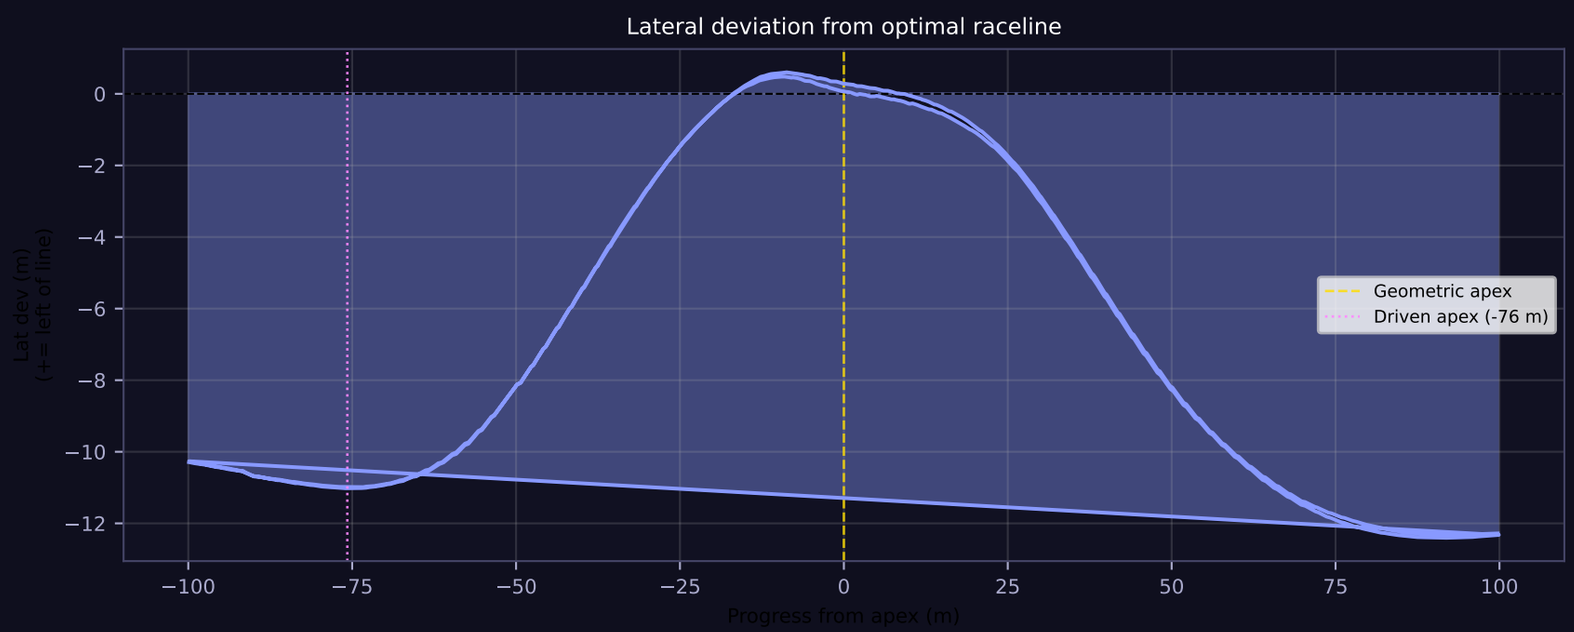
- Over-braking on entry
  Entry speed 72% of reference (−28%)
- Slow apex
  Apex speed 57% of reference (−43%)
- Slightly wide at apex
  Apex deviation -1.3 m
- Late apex
  Driven apex 35 m past geometric apex
- Early throttle
  Throttle applied before apex — risk of understeer on exit
- Throttle loss on exit
  Exit speed 55% of reference (−45%)

C4 (R, R=21m, 16.1m/s)

Apex at s = 2320 m | Reference speed: 16.1 m/s | Window: [2220, 2420] m







Corner analysis

```
Entry speed:  81.0%
Apex speed:   77.4%
Exit speed:   77.2%

Apex lat dev: -0.16 m
Apex lag:     -75.7 m
Brake start:  +6 m from apex
Throttle app: +0 m from apex

⚠ Issues detected:
  • Over-braking on entry
    Entry speed 81% of reference (−19%)
  • Slow apex
    Apex speed 77% of reference (−23%)
  • Early apex
    Driven apex 76 m before geometric apex
  • Early throttle
    Throttle applied before apex — risk of understeer on exit
  • Throttle loss on exit
    Exit speed 77% of reference (−23%)
```
